

Lexia Reading Skills Programme

Pilot offer to NESA

What is Lexia?

Personalised computer-led programme that targets literacy skills gaps as they emerge and accelerates lasting progress.

Used successfully in several NESA schools to help pupils develop the skills required to succeed across the curriculum and national tests.

Research proven by over 20 external research studies including an efficacy study from the EEF.

What is our offer to NESA?

In the spirit of the NESA initiative in sharing good practice to improve learning outcomes, we offer each alliance an enhanced pilot of the Lexia Reading Skills programme.

After the pilot, school alliances can access tailored group rates. Participation is optional—any interested schools are welcome to join.

What does an enhanced pilot include?

- ✓ Full programme license for an extended period of 60 days
- ✓ Full group training including feedback and best practice guidance from current NESA users.
- ✓ Online follow-up progress meetings
- ✓ Individual school support where required
- ✓ Final face-to-face feedback session

We already use Lexia. What's in it for us?

Your active involvement in the pilot in terms of hosting a training session and sharing good practice can enable a discount on extra licenses or your license renewal.
