

Do you need a free extra pair of hands in your nursery or classroom? – Working in partnership with NHS Choices College

Looking for Classroom Volunteers?

Do you need an extra pair of hands in your nursery, reception or key stage 1 class? We have a small group of enthusiastic students who are very keen to work with young children and would like to develop their experience and learn how to help young people in their care. The students would be volunteers in the classroom or nursery and would be available up to 4 days a week supporting within the classroom and helping with classroom related activities. Placements can last from 12 weeks up to one academic year, provided it is working for both the school or nursery and the young person.

The school and staff will be fully supported in this process. Full training is provided and Choices College supports the young person and placement staff for the duration of the placement.

We are looking for genuine work experience opportunities and the aim is, after training, to have our students working independently supporting you in the classroom. Students would be placed on a volunteer DBS through your school or nursery at no cost to the school. We complete all other paperwork for you and provide full support, advice and assistance as and when required.
