

Study Day

“Supporting children where they live and learn in education and hospice settings”

Monday 8 February 2027 (8:30am – 4:30pm)

Education Centre, Royal Victoria Infirmary

Fee: £250

Join our paediatric nurse specialists for a full-study day exploring the most commonly seen long term conditions affecting children and young people today.

The programme for the day has been designed to introduce people who teach, care for and support children with additional needs or potentially life-threatening conditions to gain a good understanding of their ailment or illness. Our specialists will also provide the essential knowledge, tools and guidance on what to do if a child in their care needs immediate clinical expertise or rapid support. The day will be structured around presentations in the morning followed by practical breakout sessions in the afternoon.

What to Expect:

- **Introduction to Type 1 Diabetes:** Supporting care, safety and wellbeing
- **Paediatric Stomas:** The basics and catheter care
- **Caring for Children on Parenteral Nutrition:** “The Essentials”
- **Complex Airways:** An introduction to paediatric tracheostomies
- **Paediatric Epilepsy:** Awareness and Rescue Therapy
- **Asthma: Management Plans & Devices:** Living with Asthma in 2026
- **Long Term Ventilation:** Basics and troubleshooting for LTV patients
- **Paediatric Allergy:** Essential knowledge and practical care guidance for allergic children

Whatever your area of interest, this is a superb opportunity to seek insight, advice and practical guidance from specialists who support children, young people and their families every single day, helping to keep you informed and more confident.

Don't miss this opportunity to strengthen your knowledge and network with peers.
